

# The Blue Avians & The Law of One

Week 4:  
Fourth Density Earth &  
Life in Higher Densities

# Overview of Week 4

- The **nature of 4<sup>th</sup> density** experience
- Overview of Corey's **history with the Anshar** (4<sup>th</sup> density humans)
- Shifting **role of technology** in higher density civilizations
- Evolutionary steps **beyond 4<sup>th</sup> Density**
- Importance of self acceptance in **transitioning to 4<sup>th</sup> density** more smoothly

# Blue Avian's View of 4<sup>th</sup> Density Effects

# The Honeycomb Earth Corroboration

- 60.21 You may say that your sphere is of an **honey-comb nature**. The center is, however, solid if you would so call that which is molten.
- 60.23 **Question**: are there any **inner civilizations** or entities living in these areas that are some of the other than physically incarnate who do **come and materialize on the Earth's surface** at times?
- Ra: I am Ra. As we have noted, **there are some** which do as you say. Further, there are some inner plane entities of this planet which prefer to do **some materialization into third-density visible** in these areas. There are also **bases**, shall we say, in these areas of those from elsewhere, **both positive and negative**. There are **abandoned cities**.

# Corey's Experiences with the Anshar

# Life in 4th Density

- 16.50 "We can only explain what is not and approximate what is."
- "That which fourth density is not: it is not of **words**, unless chosen. It is **not of heavy chemical vehicles** for body complex activities. It is **not of disharmony within self**. It is **not of disharmony within peoples**. It is not within limits of possibility to **cause disharmony in any way**."
- "it is a plane wherein one is **aware of the thoughts of other-selves**; it is a plane where one is aware of the **vibrations** of other-selves; it is a plane of **compassion** and **understanding of the sorrows** of third density; it is a plane **striving towards wisdom** or light; it is a plane wherein **individual differences are pronounced although automatically harmonized by group consensus**."
- 43.9-10 "The use of physical **pain is minimal**... you would call this variety of pain **weariness**."

# Effects of 4<sup>th</sup> Density Group Consciousness

# The Social Memory Complex in 4<sup>th</sup> Density

- 66.30 “The fourth density is more dense and it is far more difficult to hide the true vibrations of the mind/body/spirit complex. This enables fourth-density negatives, as well as positives, the chance to form social memory complexes.”
- 11.17 A social memory complex [forms] when [an entire group of] entities are of one orientation or seeking. The group memory lost to the individuals in the roots of the tree of mind then becomes known to the social complex, thus creating a social memory complex.”
- 47.2 “[in] a social memory complex, all experience of each entity is available to the whole of the complex. Thus the Creator knows more of Its creation in each entity partaking of this communion of entities”
- 11.6 “The [Orion group] crusaders move in their chariots to conquer planetary mind/body/spirit social complexes before they reach the stage of achieving social memory.”

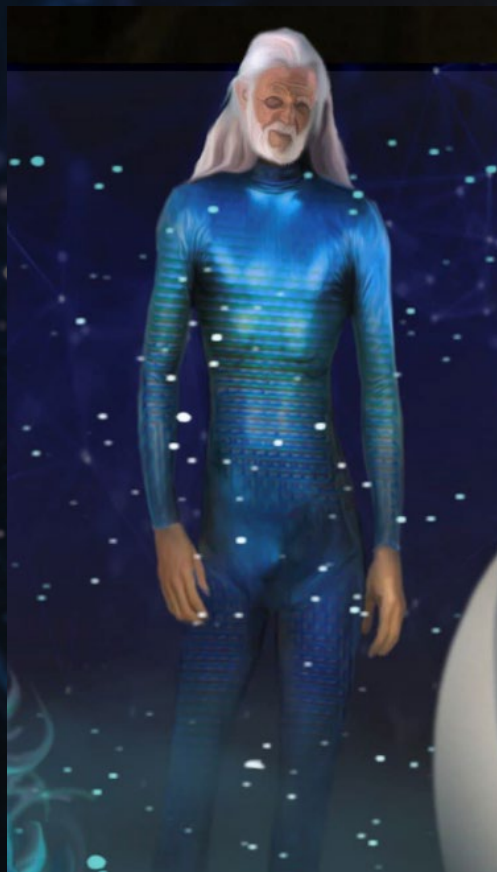

# Food in Fourth Density

- 43.18-19 The **fourth-density** ... preparation of foodstuffs is extremely simple due to **increased communion** between **entity and living foodstuff**. Therefore, this is not a significant catalyst but rather **a simple precondition** of the **space/time experience**. The catalyst ... aids in the teach/learning of patience. **[This is because,] to stop the functioning of service to others** long enough to ingest foodstuffs **is to invoke patience**.

# Activities of the Anshar to Aid Humanity

# The “Thought War” of Fourth Density

- 25.4 “For many of your centuries, both the Confederation and the [Orion Group] busied themselves with each other upon planes above your own... planes in time/space whereby machinations were conceived and the armor of light girded on. Battles have been and are continuing to be fought upon these levels.”
- 25.6 “The only consequence which has been helpful is a balancing of the energies available to this planet so that these energies have less necessity to be balanced in this space/time, thus lessening the chances of planetary annihilation.”
- 25.9 The fourth density is the only density besides your own which, lacking the wisdom to refrain from battle, sees the necessity of the battle.
- 78.25 “[For 4<sup>th</sup> and 5<sup>th</sup> densities] It is to be noted that in attempting to sway third-density mind/body/spirit complexes in choosing polarity there evolves a good bit of interaction between the two polarities”

# Technology in 4<sup>th</sup> Density Civilizations

# Technological Vs. Spiritual Evolution

- 52.2 “The use of technology to manipulate that outside the self is far, far less of an aid to personal evolution than the disciplines of the mind/body/spirit complex resulting in the whole knowledge of the self in the microcosm and macrocosm.

To the disciplined entity, all things are open and free. The discipline which opens the universes opens also the gateways to evolution. The difference is that of choosing either to hitchhike to a place where beauty may be seen or to walk, step by step, independent and free in this independence to praise the strength to walk and the opportunity for the awareness of beauty.

The hitchhiker, instead, is distracted by conversation and the vagaries of the road and, dependent upon the whims of others, is concerned to make the appointment in time. The hitchhiker sees the same beauty but has not prepared itself for the establishment, in the roots of mind, of the experience.”

# The Frontal Lobes Wake Up in 4<sup>th</sup> Density

- 61.13 **The frontal lobes of the brain** will ... **have much more use in fourth density**. The primary mental/emotive condition of this large area of the so-called brain is **joy or love in its creative sense**. ... the healing, the learning, the building, and the energizing — are to be found in this area... This is **the area which**, working through the trunk and root of mind, **makes contact with intelligent energy** and through this gateway, **intelligent infinity**.
- 34.2 [Perceptions of **Intelligent Infinity**] range from a **limitless joy** to a strong dedication to service to others while in the incarnated state ... [an experience] of **unspeakable profundity**... the desire to communicate or use this experience to aid others is extremely strong.

# Experience in 5<sup>th</sup> Density

- 90.7 In **fifth density** the manifestation of the **physical complex** is more and **more under the control of the conscious mind complex**. Therefore, the fifth-density entity may dissolve one manifestation and create another.
- 52.4 "As positive fifth density **moves into sixth** there are virtually no entities which **any longer use outer technology** for travel or communication."
- 16.41 "The **fifth-density harvest** is of those whose vibratory distortions consciously **accept the honor/duty of the Law of One**."

# Ra's History of Evolution to 6<sup>th</sup> Density

- 41.26 "We [Ra] who experienced the vibratory densities [upon] Venus [2.6 billion years ago] were fortunate in being able to move in harmony with the planetary vibrations with an harmonious graduation to second, to third, and to fourth, and a greatly accelerated fourth-density experience.

We spent much time/space... in fifth density balancing the intense compassion we had gained in fourth density. The graduation again was harmonious and our social memory complex which had become most firmly cemented in fourth density remained of a very strong and helpful nature.

Our sixth-density work was also accelerated because of the harmony of our social memory complex so that we were able to set out as members of the Confederation to even more swiftly approach graduation to seventh density. Our harmony, however, has been a grievous source of naïveté as regards working with your planet.

# Life in 6<sup>th</sup> Density (Density of Ra/BA)

- 64.6 **We seek the Creator** upon a level of shared experience to which you are not privy and **rather than surrounding ourselves in light we have become light**. Our understanding is that **there is no other material except light**. Our **rituals...** are an **infinitely subtle continuation** of the balancing processes which you are now beginning to experience.

We seek now **without polarity**. Thus we do not invoke any power from without, for **our search has become internalized** as we become light/love and love/light. These are the balances we seek, the **balances between compassion and wisdom** which more and more **allow our understanding** of experience to be informed [so] that we may come **closer to the unity with the One Creator** which we so joyfully seek.

- 41.5 In this density some entities whose **means of reproduction is fusion** may choose to perform this portion of experience as **part of the beingness of the sun body**. Thus you may think of **portions of the light that you receive** as offspring of the generative **expression of sixth-density love**.

# Our Closest Neighbor's 4<sup>th</sup> Density Transition Examples

# Fourth Density Souls Coming In Already

- 63.12 **Questioner**: Approximately **how many are here now** who have come from other planets **third density harvestable for fourth-density** experience?  
Ra: I am Ra. This is a recent, shall we say, phenomenon and the number is **not yet in excess of 35,000 entities**. [As of July 1981]
- 63.15 **Questioner**: Would the purpose in **transitioning to Earth prior** to the complete **changeover** then be for the **experience** to be **gained** here during the harvesting process?  
Ra: I am Ra. **This is correct**. These **entities are not Wanderers** in the sense that this planetary sphere is their **fourth-density home planet**. However, the experience of this service **is earned only by those harvested** third-density entities which have **demonstrated a great deal** of orientation towards **service to others**. It is a **privilege to be allowed this early an incarnation** as there is much experiential catalyst in service to other-selves at this harvesting.

# Taking Advantage of 3<sup>rd</sup> Density While We Can

- 20.24 “The mind/body/spirit complex of third density has perhaps **one hundred times as intensive** a program of catalytic action from which to distill distortions and learn/teachings than any other of the densities”
- 77.15 “**The intensity of fourth density** is that of the **refining** of the **rough-hewn sculpture**. This is, indeed, in its own way, quite intense causing the mind/body/spirit complex to move ever inward and onward in its quest for fuller expression. However, **in third density the statue is forged in the fire**. This is a **type of intensity** which is not the property of fourth, fifth, sixth, or seventh densities.”

# Self Acceptance is Key to Adeptness

- 74.11 “The heart of **the discipline of the personality** is threefold. One, **know yourself**. Two, **accept yourself**. Three, **become the Creator**.
- 52.7 “It is **paramount that it be understood** that it is **not desirable** or helpful to the growth of the understanding... of an entity by itself **to control thought processes or impulses** except where they may result in actions not consonant with the Law of One.  
...**Acceptance of self, forgiveness of self**, and the **direction of the will**; this is the path towards the disciplined personality.
- 32.14 **The indigo ray [3<sup>rd</sup> Eye Chakra]** is opened only through **considerable discipline and practice** largely having to do with **acceptance of self**, not only as the polarized and balanced self but as the Creator, **as an entity of infinite worth**.
