

The Blue Avians & The Law of One

Week 5: Breaking Free From Paradigms of Control

Overview of Week 5

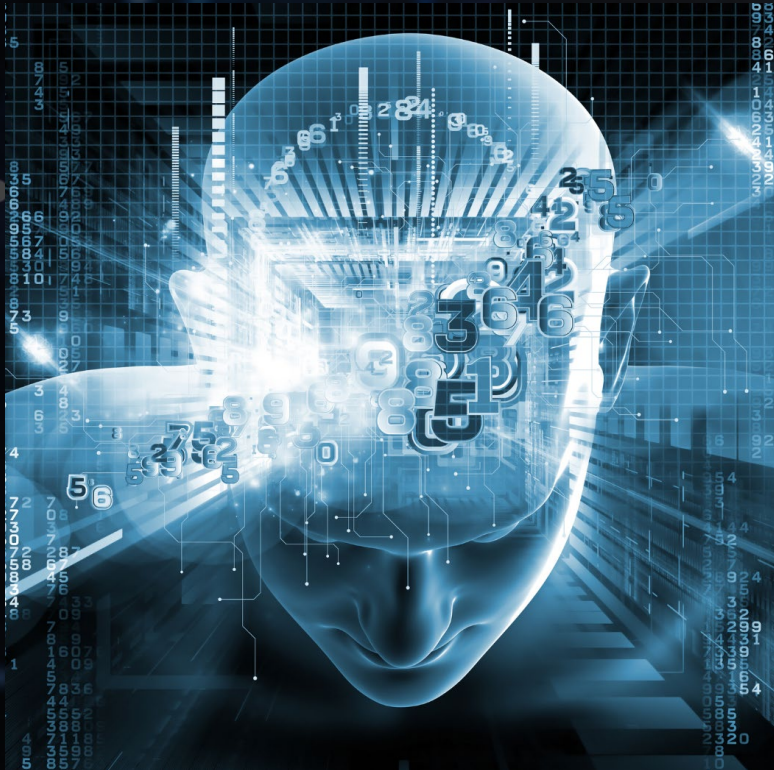

- The **balanced, conditional, nature of negative influence** from service-to-self (negative) beings
- **Recognizing & avoiding the temptations of negative influence**
- **Solar System & Earth Quarantines** that preserve balance & free will
- **Taking responsibility for karma, healing & chakra blockages**
- The power of free will in determining our future, collectively and individually

Nature of the Orion / Draco Beings

- 7.15 “[In the **Orion Group**] There are a very few third density, a larger number of 4th density, a similarly large number of 5d, and very few 6d ... Their numbers are perhaps **one-tenth** ours [meaning the **Confederation of Planets in the Service of the Infinite Creator**]. Their power is the same as ours. The Law of One **blinks neither at the light or the darkness...** It should be **noted**, carefully pondered, and accepted, that the **Law of One** is available to **any social memory complex** which has decided to **strive together for any seeking of purpose**, be it **service to others** or **service to self**.
- 8.14 “**their objective** is to **locate** certain mind/body/spirit complexes which **vibrate in resonance with their own vibrational complex ...**
- 11.18 “**Through [the elite]**, the attempt begins to create a condition whereby the remainder of the planetary entities are **enslaved by their own free will**.
- 12.2 **There are various civilization complexes** which work within this group. Some are more able to use intelligent infinity than others. The information is very seldom shared; therefore, **the chariots [ships] vary greatly in shape and appearance**.

Blue Avians Reveal Extent & Purpose of Interdimensional A.I. Influence

Technology is Offered by Both Sides

- 11.21 The Orion group passes on information concerning ... the orientation of service to self. The information can become technical just as some in the Confederation, in attempts to aid this planet in service to others, have provided what you would call technical information. The technology provided by this [Orion] group is in the form of various means of control or manipulation of others to serve the self.
- 8.11 The technology your peoples possess at this time is capable of resolving each and every limitation which plagues your social memory complex at this present nexus of experience. However, the concerns of some of your beings with distortions towards what you would call powerful energy cause these solutions to be withheld until the solutions are so needed that those with the distortion can then become further distorted in the direction of power."

Solar System Wide Quarantine Balancing

Earth Quarantine & Balancing

- 12.3 “Every effort is made to quarantine this planet. However, the network of guardians, much like any other pattern of patrols on whatever level, does not hinder each and every entity from penetrating quarantine, for if request is made in light/love, the Law of One will be met with acquiescence.”
- 16.2 “The balancing is from dimension to dimension [or density to density]. The attempts of the so-called Crusaders to interfere with free will are acceptable upon the dimension of their understanding. However... in order to balance the dimensional variances in vibration, a quarantine was set up, this being a balancing situation whereby the free will of the Orion group is not stopped but given a challenge. Meanwhile, the third-density group is not hindered from free choice.
- 12.7 “The vibratory level of those able to reach the quarantine boundaries is such that upon seeing the love/light net it is impossible to break this Law. Therefore, nothing happens. No attempt is made. There is no confrontation. The only beings who are able to penetrate the quarantine are those who discover windows or distortions in the space/time continua surrounding your planet’s energy fields. Through these windows they come. These windows are rare and unpredictable.”

Window Phenomenon = Portals?

- 72.8 For the most part, [Negative/Orion entities] are unable to enter this planetary sphere of influence and **are able to use the windows** of time/space distortion only insofar as there is **some calling to balance the positive calling**.
- 16.5 The window phenomenon is an other-self **phenomenon from the Guardians**. It operates **from the dimensions beyond space/time** in what you may call the area of **intelligent energy**. Like your cycles, such balancing, such rhythms are as a clock striking. In the case of the windows, no entities have the clock. Therefore, it seems random. **It is not random in the dimension which produces this balance.**"
- 17.27 [Q: **What causes Spontaneous Combustion?**]
Ra: Picture, if you will, a forest. One tree is struck by lightning. It burns. Lightning does not strike elsewhere. Elsewhere does not burn. **There are random occurrences** which do not have to do with the entity but with the **window phenomenon of which we spoke**.

Negative Entity Attachments & Energy Center/Chakra Blockages

49.5 "This phenomenon [known as] kundalini ... **may better be thought of as the meeting place of cosmic and inner vibratory understanding...**

49.6 [The Chakras represent] "**the meeting place of inner and outer natures**"

51.5 "**Blockages** may occur **betwixt spirit and mind**, or **body and mind**, upon many different levels... Thus spiritual/mental blockages combined with mental/bodily blockages **may affect each of the energy centers** in several differing ways."

Chakra Activation is about Perspective

- 49.6 “[To **fully awaken** our energy] each experience will need to be **observed, experienced, balanced, accepted, and seated within...**”

Each experience will be sequentially understood ... in terms of **survival**, then in terms of **personal identity**, then in terms of **social relations**, then in terms of **universal love**, then in terms of how the experience may beget **free communication**, then in terms of how the experience may be **linked to universal energies**, and finally in terms of the **sacramental nature** of each experience.

- 15.12 The [**yellow-ray, solar plexus**] blockage resembles most closely that which **you have called ego...** Blockages in this center will often manifest as distortions towards power manipulation and **other social behaviors concerning [other-selves]**.

The center of heart, or green ray, is the center from which **third-density beings may springboard**, shall we say, **towards infinite intelligence**. Blockages in this area **may manifest as difficulties in expressing** what you may call **universal love, or compassion**.

Nature of Negative Entity Temptations

- 87.9 “The fourth-density [negative] habit is that of offering temptations and of energizing pre-existing distortions.”
- 62.23 “Nearly all positive channels and groups may be lessened in their positivity or rendered quite useless by what we may call the temptations offered by the fourth-density negative thought-forms. They may suggest many distortions towards specific information, towards the aggrandizement of the self, towards the flowering of the organization in some political, social, or fiscal way.”
- 67.7 “The normal gambit of [4th density “Minions”] attack is the tempting of the entity or group of entities away from total polarization towards service to others and toward the aggrandizement of self or of social organizations with which the self identifies.”
- 62.20 “If fourth-density temptations, shall we say, towards distortion of ego, etc., are not successful the fifth-density entity then thinks in terms of the removal of light.”

Less Common Forms of Negative Greeting

- 80.4 Any distortion, be it physical, mental, or spiritual in complex nature, may be accentuated by the suggestion of one able to work magically; that is, to cause changes in consciousness. This entity [Carla] has many physical distortions. Each in the group has various mental distortions. Their nature varies. The less balanced the distortion by self-knowledge, the more adeptly the entity may accentuate such a distortion in order to mitigate against the smooth functioning and harmony of the group.
- 67.7 ...by far the most vulnerable [of the three was Carla] due to its pre-incarnative physical complex distortions.
- 57.3 "The Orion group cannot interfere directly but only through pre-existing distortions of mind/body/spirit complexes. Thus in this case, this entity reached for an heavy object with one hand and this miscalculated action caused a deformation or distortion of the skeletal/muscular structure of one of this instrument's appendages.

Technique to Nullify Negative Influence

- 44.10 **Question:** Can you suggest a method whereby we might, shall I say, **nullify the effect of the influence** that we don't want from a negative source?

Ra: There are various methods. We shall offer the most available or simple. To share the difficult contact with the other-selves associated with this working and to meditate in love for these senders of images and light for self and other-selves is the most available means of nullifying the effects of such occurrences. To downgrade these experiences by the use of intellect or the disciplines of will is to invite the prolonging of the effects. Far better then to share in trust such experiences and join hearts and souls in love and light with compassion for the sender and armor for the self.

- 76.26 Q: .. **is nothing that we can do for [the negative entity]?**

Ra: "There is great humor in your attempt to be of polarized service to the opposite polarity. There is a natural difficulty in doing so since **what you consider service** is **considered by this entity, non-service**. As you send this entity love and light and wish it well it loses its polarity and needs to regroup.

Simplified Protection Principles

- 32.1 "Give thanksgiving for each moment. See the self and the other-self as Creator. Open the heart. Always know the light and praise it."
- 64.21 "As always, **love is the greatest protection.**"
- 55.2 "There is no magic greater than honest distortion toward love."
- 92.32 "To bear fruit is a protected activity."

Karma & Forgiveness

- 34.4 “Our understanding of karma is that which **may be called inertia**. Those actions which are put into motion will continue using the ways of balancing until such time as the controlling or higher principle which you may liken unto your **braking or stopping is invoked**. This stoppage of the inertia of action **may be called forgiveness**. These two concepts are inseparable.”
- 17.20 “In forgiveness lies **the stoppage of the wheel of action**, or what you call karma.”
- 34.5 Q: “is there then **programming that sometimes** occurs so that he will experience catalyst that will enable him **to get to a point of forgiveness** thereby alleviating the karma?”
 Ra: This is, **in general**, correct. However, both self and any involved other-self may, **at any time** through the process of **understanding, acceptance, and forgiveness, ameliorate these patterns**. This is true at any point in an incarnative pattern. Thus one who has set in motion an action may forgive itself and never again make that error. This also brakes or stops what you call karma.”

Humanity's Collective Blockages & Karma

Negative Path & “That Which Is Not”

- 85.9 “Those which have chosen the [negative] path have simply used the veiling process **in order to potentiate that which is not**. This is an entirely acceptable method of self-knowledge of and by the Creator.”
- 100.9 “The polarities are both dependent upon a limited viewpoint. However, the **negative polarity depends** more heavily upon the **illusory separation** betwixt the self and all other mind/body/spirit complexes. The **positive polarity attempts to see through the illusion** to the Creator in each mind/body/spirit complex...”
- 85.11 “**That which is not** may be seen as a self-imposed darkness in which harmony is turned into an eternal disharmony. However, that which is not **cannot endure throughout the octave of third density** and, as darkness eventually calls the light, so does that which is not **eventually call that which is**.”
- 78.24 “In sixth density, the density of unity, the positive and negative paths must needs take in each other for all now must be seen as love/light and light/love. This is not difficult for the positive polarity, which sends love and light to all other-selves. It is difficult enough for service-to-self polarized entities that **at some point the negative polarity is abandoned**.

Balancing Emotional Reactions is Key

- 42.4 **Questioner:** Would a perfectly balanced **entity feel an emotional response** when being attacked by the other-self?
Ra: I am Ra. This is correct. **The response is love.**
- 42.2 “The **catalyst of experience** works in order for the **learn/teachings of this density to occur**. However, **if there is seen in the being a response**, even if it is **simply observed**, the entity is **still using the catalyst for learn/teaching**. The end result is that the **catalyst is no longer needed**. Thus this density is no longer needed. **This is not indifference** or objectivity but a **finely tuned compassion and love** which **sees all things as love**. This seeing elicits no response due to catalytic reactions. Thus the entity is now able to become co-Creator of experiential occurrences. This is the truer balance.”
- 18.5 “**It is a shortcut to simply ignore or overcome any desire**. It must instead be **understood and accepted**. This takes **patience and experience** which can be analyzed with care, with **compassion for self and for other-self**.”

Balancing Exercises

- Exercise to trace **every emotionally charged experience** back to the root imbalance that brought the emotion
- 5.2 “To begin to master the concept of mental discipline it is necessary to examine the self. **The polarity of your dimension must be internalized.** Where you find patience within your mind you must consciously find the corresponding impatience and vice versa. **Each thought that a being has, has in its turn an antithesis.** The disciplines of the mind involve, first of all, identifying both those things of which you approve and those things of which you disapprove within yourself, and then **balancing each and every positive and negative charge with its equal.** The mind contains all things. Therefore, you must discover this completeness within yourself.”
- 42.2 “The exercise of first experiencing feelings and then consciously discovering their antitheses within the being **has as its objective not the smooth flow of feelings** both positive and negative while remaining unswayed but rather **the objective of becoming unswayed.** This is a simpler result and takes much practice, shall we say.”

The Stage Changes & Nothing is Lost

- (104.26) "I am Ra. We leave you **in appreciation of the circumstances of the great illusion** in which you now choose to play the pipe and timbrel and move in rhythm. **We are also players upon a stage.** The stage changes. The acts ring down. **The lights come up once again.** And throughout the grand illusion and the following **and the following** there is the undergirding majesty of the One Infinite Creator. All is well. Nothing is lost. Go forth rejoicing in the love and the light, the peace and the power of the One Infinite Creator. I am Ra. Adonai."
